Project Planning: Part 2

Outcome Examples

The following examples are outcomes for an online health resources training program offered by a public library system. The staff will be trained, and then it is expected that staff will train patrons.

Outcome Example #1:				
Library staff effectively search online health resources (OHR).				
Indicator(s):	Data Sources:	Data Intervals:	Target Audience:	Target Achievement Level (Goal):
# and % of workshop participants who can name 3 OHR	Quiz	End of workshop	Staff workshop participants N = 100	85 or 85%
# and % of workshop participants who can complete 3 prescribed OHR searches	Same as above	Same as above	Same as above	Same as above

Outcome Example #2:				
Library staff teach patrons to use online health resources (OHR) through formal trainings.				
Indicator(s):	Data Sources:	Data Intervals:	Target Audience:	Target Achievement Level (Goal):
# and % of staff who report holding at least 1 OHR training for patrons	Staff reports	After 6 months, then annually	Staff workshop participants N = 100	50 or 50%
# and % of workshop participants who can name 3 OHR	Quiz	End of workshop	Patron workshop participants N = 500	325 or 65%
# and % of workshop participants who can complete 3 prescribed OHR searches	Same as above	Same as above	Same as above	Same as above
